# SLA5800 Series

Elastomer Sealed, Digital,  
General Purpose Thermal Mass Flow  
Meters & Controllers for Gases

Model SLA5850  
with EtherNet/IP™

The SLA5800 Series thermal mass flow meters and mass flow controllers have gained broad acceptance as the standard for accuracy, stability and reliability. These products have a wide flow measurement range and are suitable for a broad range of temperature and pressure conditions making them well suited for chemical and petrochemical research, laboratory, analytical, fuel cell and life science applications, among others.

Highlights of the SLA5800 Series include: industry leading long-term stability, accuracy backed by superior 17025 metrology systems and methods using calibration systems directly traceable to international standards, and a broad range of analog and digital I/O options to suit virtually any application. An independent diagnostic/service port permits users to set alarms and diagnostics, tune, troubleshoot or change flow conditions without removing the mass flow controller from service.

The SLA5800 Series provides a highly configurable platform based on a simple modular architecture. The feature set was carefully selected to enable drop-in replacement and upgrade of many brands of mass flow controllers. With the wide range of features and options available, the SLA5800 Series provides users with a single platform to support a broad range of applications.

Features	Benefits
Industry leading long-term sensor stability	Increased system uptime and reduced cost of ownership by reducing maintenance and eliminating periodic recipe adjustments and/or recalibrations
User accessible service port	Simplified installation, start-up, troubleshooting and access to diagnostics provides maximum uptime
Alarms and diagnostics	Ensures device is operating within user specified limits for high process yield and uptime
Superior valve technology	Minimum leak-by, wide turndown, fast response and superior corrosion resistant materials reduces overall gas panel cost and increases throughput
High accuracy traceable to international standards	Calibration by verified metrology systems ensures precise process gas flow control
Simple modular design	Easy-to-service elastomer sealed design provides for factory or field service maximizing uptime and reducing total cost of ownership
Adaptable mechanical configurations	Easily retrofit to existing systems

## Superior Thermal Flow Measurement Sensor

Brooks' sensor technology combines:

- Excellent signal to noise performance for good accuracy at low setpoints
- Superior long-term stability through enhanced sensor design manufacturing and extensive burn-in process
- Isothermal packaging to reduce sensitivity to external temperature changes

## Advanced Diagnostics

The mass flow controller remains the most complex and critical component in gas delivery systems. When dealing with highly toxic or corrosive gases, removing the mass flow controller to determine if it is faulty should be the last resort. In response to this, Brooks pioneered smarter mass flow controllers with embedded self-test routines and introduced an independent diagnostic/service port to provide the user with a simple interface, for troubleshooting without disturbing flow controller operation.

## Wide Flow Range

The SLA5800 Series covers an extremely broad range of flow rates. Model SLA5850 can have a full scale flow as low as 3 ccm. With a high turndown ratio of 100:1 for any full scale range from 1-50 lpm N2 equivalent and 50:1 (250:1 turndown for *Biotech* Options Packages up to 150 LPM) turndown for all other flow rates, accurate gas flow can be measured or controlled down to 0.06 ccm! Model SLA5853 can monitor or control gas flows up to 2500 lpm.

## Fast Response Performance

The all-digital electronics and superior mechanical configuration in the SLA5800 Series provide for ultra-fast response characteristics.

## Broad Array of Communication Options

Traditional 0-5 Vdc and 4-20mA analog options as well as RS485 digital communications are available ("S-protocol", based on HART). Control interfaces via digital network protocols including EtherNet/IP™, PROFINET, DeviceNet®, and Profibus® are also available. EtherNet/IP™ and PROFINET are a modern, high-speed digital protocol that permits multiple, additional diagnostics to provide MFC users with rich, real-time system information. DeviceNet® has been certified by the ODVA (Open DeviceNet Vendor's Association). EtherNET/IP™ and PROFINET are pending industry conformance certification.

## Multi-gas/Multi-range Capabilities

The SLA5800 Series multi-gas and multi-range capabilities reduce inventory. Storage and pre-programming of up to 6 gas calibrations easily permits users to switch between different gasses and ranges on a single device.

The diagram shows a single SLA5800 Series MFC device on the left, followed by an equals sign and six smaller MFC icons representing different configurations: 3.6L He, 3.6L Ar, 2.6L H2, 2.6L CO, 2.0L NH3, and 2.6L N2. This illustrates the multi-gas and multi-range capabilities of the device.

*Multi-gas/Multi-range capability allows your SLA5800 Series to be programmed for a variety of different gases and flow ranges*

VOR > 4.8 Vdc	Valve Open
Input Impedence	800 kOhms
Absolute Max. Input	(-25 Vdc) < VOR < 25 Vdc (without damage)

\*The Alarm Output is an open collector or "contact type" that is CLOSED (on) whenever an alarm is active. The Alarm Output may be set to indicate any one of various alarm conditions.

\*\*The Valve Override Signal (VOR) is implemented as an analog input which measures the voltage at the input and controls the valve based upon the measured reading as shown in this section.

## SLA5800 Series *Biotech*

Efficiency and simplicity combine to improve bioprocessing performance with the new SLA5800 Series *Biotech* MFC. It incorporates several features created specifically to help streamline MFC purchasing, improve process gas control, enhance flexibility and satisfy regulatory requirements.

To serve the unique requirements of your bioprocesses, Brooks Instrument has created two SLA5800 Series *Biotech* options packages, built on the proven performance of the bioprocess-leading SLA5800 Series MFC .

As noted in the ordering instructions, all options are combined into packages with convenient ordering codes, eliminating the need to order options individually.

### SLA5800 Series *Biotech* Options Packages

#### Performance Package - Model Code S

Includes multiple performance enhancements reducing cost of operation

High Turndown Ratio

Reduces number of MFCs needed to control wide flow ranges

Enhanced Control Valve

Extremely low leak rate can eliminate need for redundant valves

Enhanced Sensor Design

Clean welded construction meets industry standards for cleanliness

Pre-calibrated Multi-Gas Pages<sup>1</sup>

Air, CO<sub>2</sub>, N<sub>2</sub> & O<sub>2</sub> : gas pages can be changed in situ to reduce the variety of spare instruments kept in stock

#### Premium Package - Model Code T

*Performance Package Features plus:*

Includes premium materials and associated certificates tailored to industry requirements

Class VI Elastomers

FDA/USP Class VI and ADI Free O-Rings and Valve Seats<sup>2</sup>  
(Certificate Included)

Certifications

Materials of Construction (wetted path)  
2.1 Material Cert<sup>3</sup>  
ICC Calibration Traceability

<sup>1</sup> CO<sub>2</sub> Actual Gas Calibration available for SLA5850/60 & SLA5851/61. Use Model Code U for Performance Package, and Model Code V for Premium package.

<sup>2</sup> All Class VI Viton elastomers are also compliant to 21CFR177.2600 (Title 21 – Food & Drugs, Chapter I - FDA)

<sup>3</sup> 3.1 Material Certs for pressure boundary components available as an option on Premium Package.

Note: All Communications protocols listed in the Electrical Specification Table, above, are available with any Biotech Option
